LARGE DIAMETER PIPING SYSTEMS SOLUTIONS

In addition to traditional solid wall HDPE pipe, ISCO offers a complete line of large diameter pipe, fittings and structures. ISCO's large diameter products offer all of the benefits of HDPE that have made traditional solid wall pipe the industry standard for critical applications with less weight, larger sizes and more options. From solid HDPE to profile wall HDPE to steel and fiberglass reinforced HDPE the products offered by ISCO have been selected based on the reputation of the manufacturers, the quality of their products and the needs of the marketplace. ISCO offers pipe, fittings and structures such as manholes, tanks and vaults with diameters up to 132" and various pressure ratings.

As a multi-line distributor of HDPE piping products of all sizes, ISCO is your one source for information, design assistance and corrosion resistant piping materials to meet all of your piping needs. Call us today for more information 1-800-345-ISCO (4726).

Large Diameter HDPE Piping Systems Offer:

- Corrosion Resistance
- Light Weight
- Multiple Jointing Options
- Hydraulic Efficiency
- Long Service Life
- Impact Resistance
- 100% Leak-Free Restrained Joints
- Flexibility of Design
- Environmental Protection
- Chemical Resistance
- Cost Effectiveness
- Abrasion Resistance
- High Strength
- Long-term Durability

Irrigation and Hydroelectric Penstocks

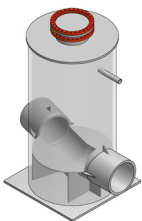

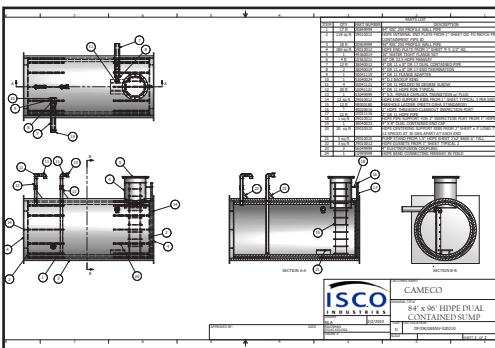

Pressurized Municipal & Industrial Applications

New Culvert and Culvert Relining

Manholes, Tanks & Structures with Design Assistance
